

## Web Based Management

All listed components can be monitored with a web based system either on site or remotely by our deicing experts. Let us install and operate your deicing site to fully leverage your FAA deicing program filing.

### Type I Proportioning

- Legendary GPS 3000 System
- Glycol savings
- Tanker truck fill kit
- Web based cabinet communication
- Access control and user billing package
- Automatic truck "fix"

### Integrated Building System

- Intrusion alarm
- Security camera systems
- Access control
- Building management system

### Financial Management

- Automatic customer billing based on user
- Automatic reordering for glycol
- Usage and cost tracking

### Glycol Offloading

- Metering
- Pressure Control
- Tank Selection

### Tank Level

- Web based tank level monitoring
- Wireless data transmission
- 24/7 data warehouse on redundant servers
- Automatic reorder set points
- Sensors for Type 1, Type IV, and water

### Mobile Fleet Monitoring

- Truck location and tracking
- Live inventory
- On board refractometer
- Deicing recording

### Type IV Delivery System

- High capacity
- No degradation
- Fluid manufacturing compartment
- Variable speed
- Safety system

### Truck Inventory and Concentration

- On board truck display shows concentration of mix and tank level of vehicle
- Wireless communication to refilling station

### Fuel System Integration

- Integrates to all major systems
- Automatic billing

### Reclaim

- Monitor reclaim tank levels
- Offloading systems
- Truck unloading
- Monitor volume in storage
- Truck control for offloading

## Who to contact:

- ◇ E Solutions
- ◇ 1-866-863-1160
- ◇ [www.e-solutions-inc.com](http://www.e-solutions-inc.com)

## To obtain a Deicing Command Center:

- ◇ We will evaluate your current site usage and existing glycol program
- ◇ We will analyze your usage and determine project your savings for free
- ◇ If your site qualifies, we will request a Letter of Intent to co-develop a project with you
- ◇ Finally, E Solutions will develop a site plan for your projected capacity and model your usage

## Financing options:

- ◇ Capital Proposal to upgrade your existing facility to the Glycol Command System
- ◇ Operating Agreement to fully leverage your FAA filing. E Solutions provides technicians and support to operate your facility for a fixed term.
- ◇ Shared Savings Contract get the Capital Proposal and Operating Agreement for no cost to you AND put some savings in your pocket.
